

**PREFERRED LANDSCAPING**

A detailed architectural line drawing of a modern building's interior. The drawing shows a long, open-plan space with a high ceiling supported by a grid of beams. Large windows on the right side offer a view of the outdoors. A stone wall is visible in the background, and the floor appears to be made of large tiles or stone. The overall style is clean and minimalist.

# STONE FIREPLACES

GAS OR ELECTRIC

If you are looking for that "stand out" piece of landscaping, here it is. Most fireplaces are rusty and almost impossible to move around. This stone fireplace will be the gathering area for the family for decades to come!

#2

# STONE KITCHENS

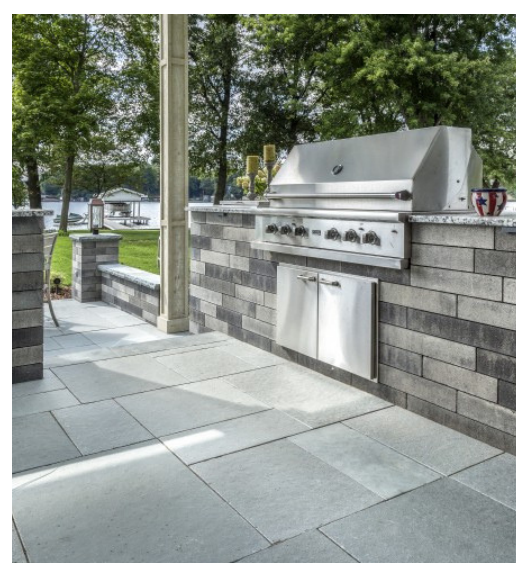

PERFECT FOR THE PATIO

Just envision yourself standing behind this amazing grill year after year. Not having to worry about replacing it every few years due to rust and corrosion. These outdoor kitchens will elevate two things. One being your home experience and the second being your home value!

## SIDEWALKS + DRIVEWAYS

STAMPED OR STANDARD

The Northeast can be brutal on wood, stone and asphalt. Causing it's lifespan to be drastically short. Cement can be laid on almost every surface with almost any design concept. It is a perfect alternative to using regular pavers.

## POOL DECKS AND PATIOS

ABOVE OR IN-GROUND

Pools are great for the summer in every age group and demographic. Decks and patios elevate the experience to the next level. Create an easy way to access the water. No more grass being dragged in and out. The perfect spot to relax on those sunny days!
